

# Hobbit House

This Hobbit House was inspired by the architecture of the houses shown in the *Lord of the Rings* trilogy, written during the mid-1900s. Although it is not built into the ground with a circular door, we think our design reflects the spirit of a Hobbit dwelling with its curved roof and funky windows. Its charm is in the “higgledy-piggledy” design that is purposely a little crooked.

On the ground

This small playhouse can be built to rest on the ground for toddlers and then a few years later raised on stilts with stairs and a slide. This treehouse design can also be built in a tree as we describe later.

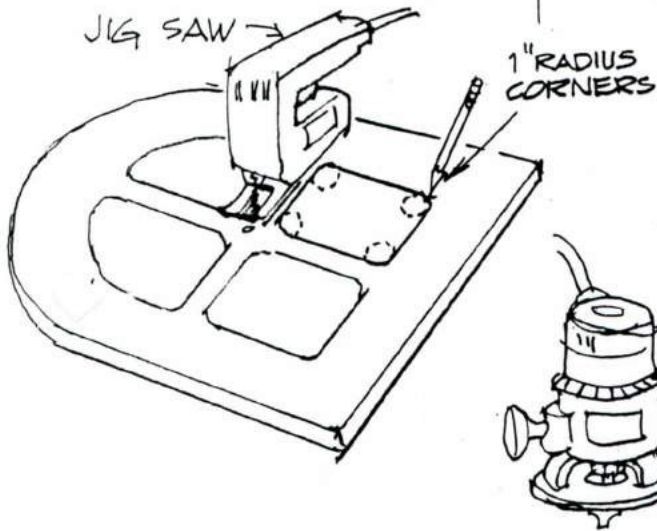

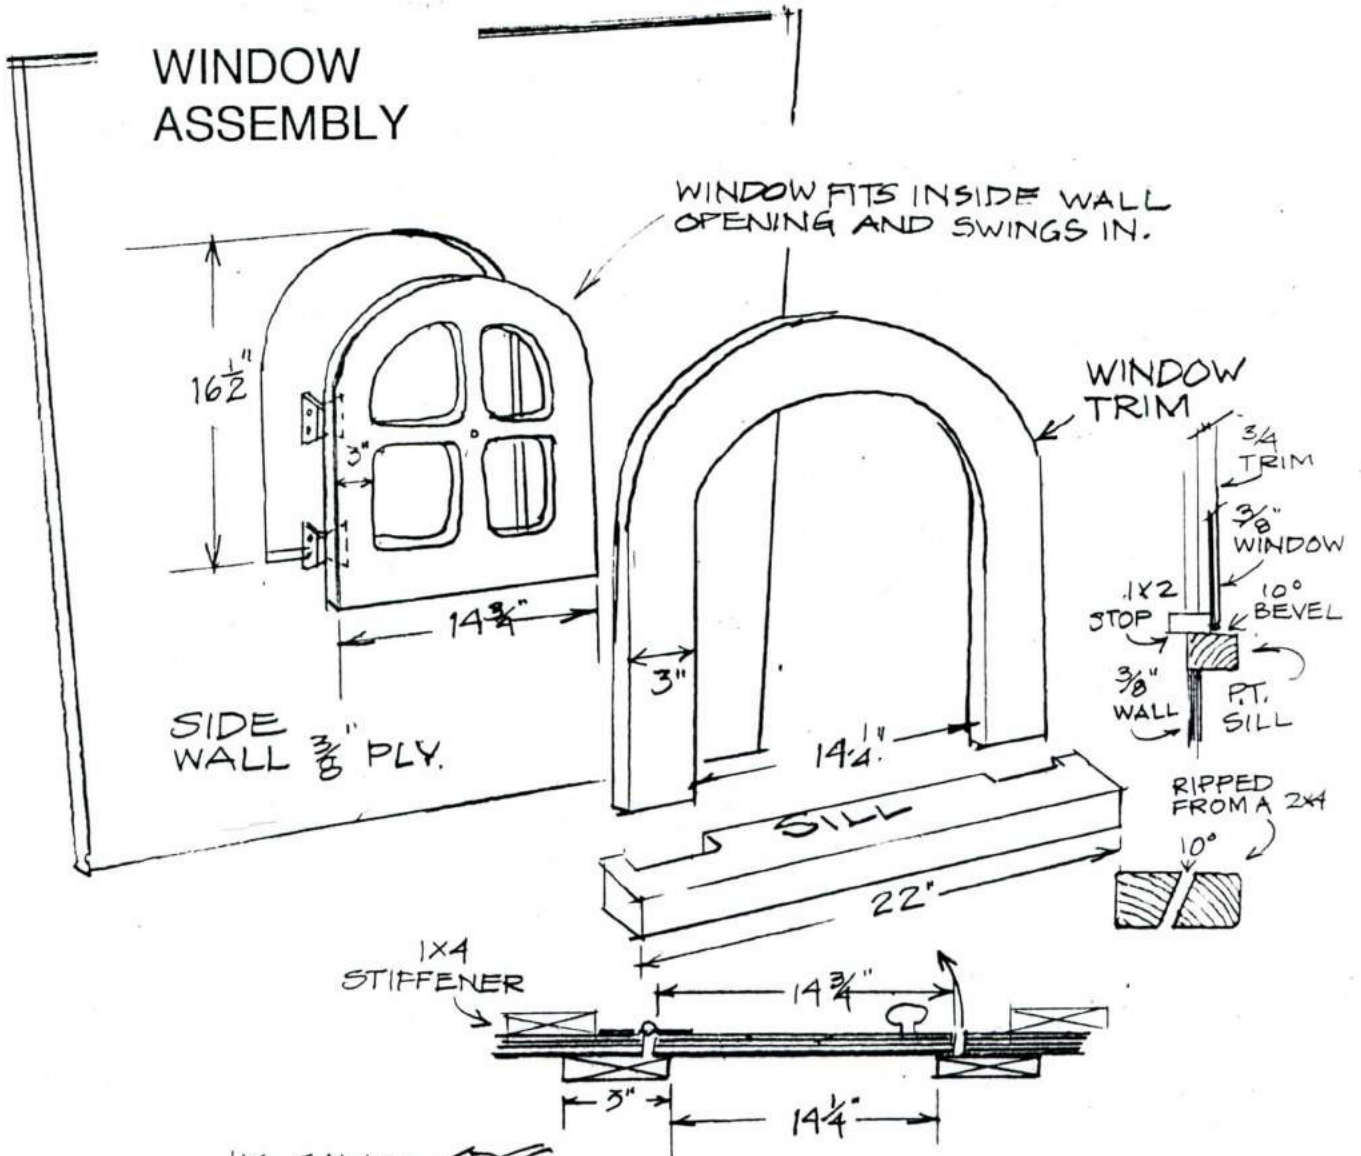

On stilts

In a tree

# WINDOW ASSEMBLY

MARK THE CENTER POINT OF THE WINDOW AND DRAW FOUR WINDOW OPENINGS AS SHOWN WITH  $1$ " RADIUS (R) AT THE CORNERS. USE A FINE TOOTH JIG SAW BLADE TO CUT OUT THE OPENINGS AND ROUND OFF THE EDGES WITH A ROUTER USING A  $\frac{1}{4}$ " ROUTER BIT.
